DENTISTRY WITH A HEART 2015

On March 21 Riverside Dental Care held our annual free dental day. Over the past eight years our free dental day has allowed us to impact so many people and families. This year I spoke with a family who had been here for the third year in a row. This is the one time of the year that their kids get any dental treatment. They show up at 6 in the morning and wait half the day until they can be seen. Each year their kids have fewer cavities that need to be fixed. Speaking with them made me realize that we really are making a difference in individual lives. Had we not fixed these childrens

teeth they would now be needing root canals or extractions. One family was traveling through from Seattle, Washington and stopped in to have their teeth cleaned. We want to thank our supporters in the community that have helped us make this day possible. I want to share a little of how many people

help and how much work goes into planning this event each year. Desert Endodontics donated root canals, which are time consuming and allowing us to do more dentistry. Susan from Henry Schein our product supplier, brought in extra sterilization equipment and supplies. Khara spends hours blowing up balloons and stringing them together to make chains and arches that you can see from all over town. Students from the UNLV school of dentistry drive up every year and help with security and translating. Texas Roadhouse donates food for all of the volunteers. We sincerely want to thank everyone who helps year after year to make this event a success.
